We track and rank a cross section of about 80 Fidelity funds monthly by C, the risk-adjusted relative strength metric. We may further separate these funds into two additional pools. One is bond or income only shown on page 3. Two is equity or growth only shown on pages 4 and 5.

After at least a two or three-month hold, we either stay with the buys or sell the laggards and buy the new leaders. This is a proactive rotational allocation strategy.

The right side of the tables show the Portfolios at month end. The left side shows new trades upcoming for the month and past trades from previous months.

The other tables show the Portfolios compared with the three World Indexes.

The chart and tables show the back tested results of buying the top three Fidelity Family funds as measured by C, holding for at least 90 days, and rotating out of the laggards into the leaders on an ongoing continuous basis. On the chart, C-lect 3 Fidelity is the blue line following a rotation strategy, VWELX (Vanguard Wellington), a balanced fund, is the red line following a buy and hold approach, and SPY (S&P 500), a domestic large cap ETF, is the green line following a buy and hold approach. The period is from 1/1/1993 through 9/30/2015. Account start values were \$100,000. No additions or subtractions were made thereafter.

While buying and selling based on C, the risk-adjusted relative performance metric, over the years and decades in the back test produced superior results, in any one year the C ranking may or may not outperform the markets. This may be due to increased market volatility in that year.

For the test, one fund's sell amount rebalanced all funds held, though in real time, one sell buys one fund for about the same dollar amount.

The same funds were used for the whole back test.

Dividends are reinvested.

Taxes are not considered.

Information does not take into account your personal situation.

Past performance does not guarantee future performance. There is no assurance that future periods will be equivalent or similar to past periods. In a back test, there is no guarantee that actual trades could actually be made at the actual prices. All investments have risk; you may lose principle when investing. There are no guarantees. Read the fund's prospectus.
