After at least a one-month hold (31 days), we either stay with the buys or sell the laggards and buy the new leaders. This is a proactive rotational allocation strategy. The funds and ranks are shown on page 2.

The right side of the top table above shows the

Fidelity Select Funds Portfolio at month end. The left side shows new trades upcoming for the month and past trades from previous months.

The lower table above shows the Fidelity Select Portfolio compared with the World Indexes.

This table shows the Fidelity Sector funds we track, including five duplicated short-term bond funds (FSHBX, FSHBXX, FSHBXXX, FSHBXXXX, FSHBXXXXX). These five are the same, but identified with extra "X". The green highlight in column 2 (Sell Eligible) means these 35 funds were part of the back test. For the most part, those will also be the funds in the portfolio, even if there are higher ranked funds. The reason for this is to provide continuity. The results of the back test are shown on page 3. The Sell Eligible column 2 also shows the five funds in the portfolio and their eligible sell date. For Fidelity Sector, we assume at least a 30-day holding period to avoid short-term redemption charges. Please see page 4 for more legend details.

Back Test Results C-lect 5 Fidelity Sector

How C-lect May Work For You

The chart and tables show the back tested results of buying the top five Fidelity Sector funds as measured by C, holding for at least 30 days, and rotating out of the laggards into the leaders on an ongoing continuous basis. On the chart, the results of C-lect 5 Fidelity Sector are the blue line, the red line shows a buy and hold results of VWELX (Vanguard Wellington), and the green line shows the results of buying and holding SPY (S&P 500). The period shown in the chart is from 1/1/1993 through 9/30/2015. Account start values were \$100,000. No additions or subtractions were made thereafter.

While buying and selling based on C, the risk-adjusted relative performance metric, over the years and decades in the back test produced superior results, in any one year the C ranking may or may not outperform the markets. This may be due to increased market volatility in that year.

For the test, one fund's sell and buy rebalanced all funds held, though in real time, one sell buys one fund for about the same amount would be practiced.

The same funds were used for the whole back test.

Dividends are reinvested.

Taxes are not considered.

Information does not take into account your personal situation.

Past performance does not guarantee future performance. There is no assurance that future periods will be equivalent or similar to past periods. In a back test, there is no guarantee that actual trades could actually be made at actual prices. All investments have risk; you may lose principle when investing. There are no guarantees. Read the fund's prospectus.
