We track and rank a cross section of three fund families monthly by C, the risk-adjusted relative strength metric.

After at least a one to three-month hold, we either stay with the buys or sell the laggards and buy the new leaders. This is a proactive rotational allocation strategy.

The right side of the portfolio tables show the Portfolios at month end. The left side may show new trades upcoming for the month and past trades from previous months.

The other tables show the Portfolios compared with the three World Indexes.

If you have any questions, please email us. Thank you.
